UNICON'S PRODUCT PROGRAMME

Includes standard products and functional concretes, produced and verified in accordance with current product standards. In addition, a number of functional concrete are declared according to own declaration.

Concrete subjected to exposure classes XS2, XS3, XF2, XF4 or XA3 must be specially ordered, as RAPID cement CEM I 52.5 N (LA) or Aalborg SOLID cement CEM II/A-V 42.5 N (EA) will be used here. The table below indicates the environmental impacts/exposure classes, the various types of concrete are suitable for.

UNI-GREEN®

PRODUCTS WITH 25 % CO₂-REDUCTION

UNI-Green product programme includes our most sustainable concretes with a reduced CO₂ footprint of 25 % compared to equivalent concretes with RAPID cement.

CO₂ EQUIV. PR M3 CONCRETE

The CO₂ footprint is indicated for life cycle stages A1-A3 (The Product Phase), cf. EN 15804. It is based on an average mix design across all of our plants, where the value is rounded up to a multiple of 5.
